

Hose with Reel

User Manual

[Revision 2.0 July 2018]

READ THIS MANUAL CAREFULLY BEFORE USE – FAILURE TO DO SO MAY RESULT IN INJURY, PROPERTY DAMAGE AND MAY VOID WARRANTY. • KEEP THIS MANUAL FOR FUTURE REFERENCE. • Products covered by this manual may vary in appearance, assembly, inclusions, specifications, description and packaging.

Set-Up

1. Drill 3 x M8 holes to match the holes located in the Mounting Bracket.
2. Connect the hose reel to the Mounting Bracket with the Pivot Pin.

It is recommended to install the mounting bracket at least 80cm from the floor.

Hose Connection

1. Pull the copper ring backwards, and visually check the U-shaped groove stuck to the cylindrical pin.

2. Loosen the copper ring to rebound, and visually check the U-shaped groove top to the cylindrical pin.

Operation

1. Pull on the hose and you can manually set the lock positions.
2. When the hose is fully extended, do not continue pulling on the hose.
3. When the hose is retracting, keep hold of the hose nozzle until the hose is fully retracted into the unit.

Troubleshooting

The most common malfunction is that the hose cannot be retracted automatically after fully extending the hose.

This often happens due to the hose being locked at the very end position of the locking point where there is no more extra hose to be pulled out. There are two ways to solve this:

1. Hold the hose at the yellow warning mark and pull with a jerking motion until the hose retracts.
2. Place the reel down on its right side, then pull on the hose until it retracts.

Some experts believe that the incorrect or prolonged use of almost any product may cause serious injury or death. To help reduce your risk of serious injury or death, refer to the information below. For more information, see www.datastreamserver.com/safety

- Consult all documentation, packaging and product labelling before use. Note that some products feature documentation available online. It is recommended to print and retain the documentation.
- Before each use, check the product for loose/broken/damaged/missing parts, wear or leaks (if applicable). Never use a product with loose/broken/damaged/missing parts, wear or leaks.
- Products must be inspected and serviced (if applicable) by a qualified technician every 6 months. This is based on average residential use by persons of average size and strength, and on a property of average metropolitan size. Use beyond these recommendations may require more frequent inspections/servicing.
- Ensure that all users of the product have completed a suitable industry recognised training course before being allowed access to the product.
- The product has been supplied by a general merchandise retailer that may not be familiar with your specific application or description of application. Be sure to attain third-party approval from a qualified specialist for your application before use, regardless of any assurances from the retailer or its representatives.
- This product is not intended for use where fail-safe operation is required. As with any product (for example, automobile, computer, toaster), there is the possibility of technical issues that may require the repair or replacement of parts, or the product itself. If the possibility of such failure and the associated time it may take to rectify could in any way inconvenience the user, business or employee, or financially affect the user, business or employee, then the product is not suitable for your requirements. This product is not intended for use where incorrect operation or a failure of any kind, including but not limited to, a condition requiring product return, replacement, parts replacement or service by a technician may cause financial loss, loss of employee time or an inconvenience requiring compensation.
- If this product has been purchased in error when considering the information presented here, contact the retailer directly for details of their returns policy, if required.
