Step 1: Attach wheels to base frame and then adjustable gas stem to base frame.

Step 2: Attach the adjustable lever to the seat base with short screws.

Step 3: Attach the arms to the seat base first using the long screws and then attach the back support to the arms using the same long screws.

Step 4: Attach the seat assembly to the adjustable gas stem.

Step 5: Place the caps over the screw holes

Step 6: Ready to ride! *This is just an expression. Do not actually ride this as it's designed only for seating.*
