

Safety

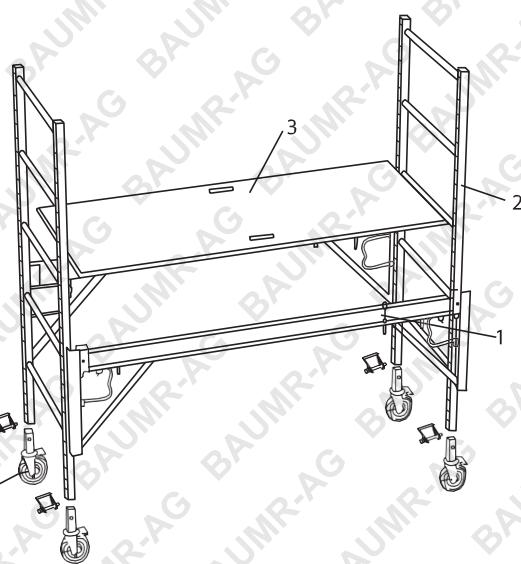

[Revision 1.0 January 2017]

Maximum load capacity = 450kg (1000lbs). Never exceed the load capacity.

Electrocution / shock hazard - The equipment is electrically conductive. Do not use where the equipment or user may contact live electrical circuits. Contacting live electrical circuits may cause serious injury or death.

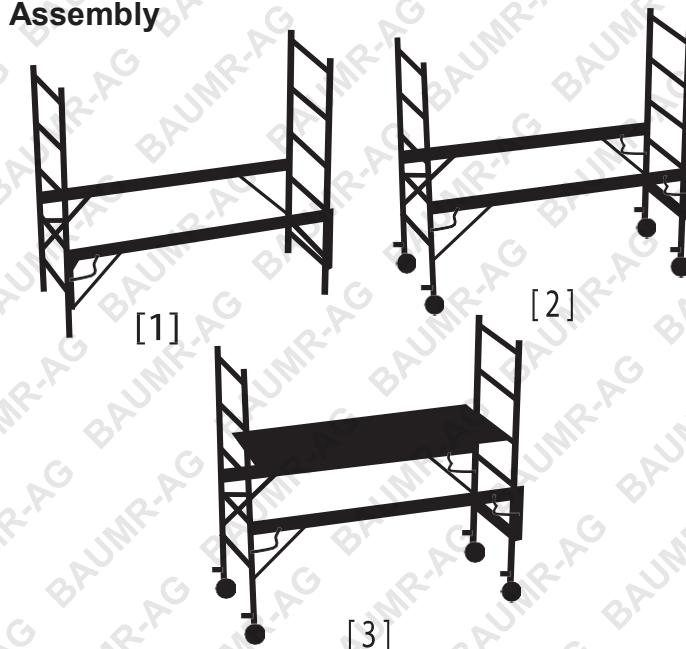

Always lock the castors before using the scaffold. • Always ensure that all locking pins are fully engaged and the retaining clips are in place. • Use the scaffold on flat and level surfaces only. Do NOT jack or adjust the scaffold to suit uneven surfaces. • Do NOT attempt to stack scaffolds on top of one another. • Where possible, guard rails and stabilizers should be used. • Always position the scaffold so that the work area can be reached without leaning or hanging off the scaffold. • Manufactured to ANSI standards.

Parts Identification

No.	Description	Qty
1	Horizontal Support Beam	2
2	Vertical Scaffold	2
3	Platform	1
4	Locking Pin	8
5	Castor	4

Assembly

1. Attach the horizontal support beams to the vertical scaffolds. Ensure that the beams are positioned at the same height and that the spring-loaded pins are fully engaged with the vertical scaffolds.
2. Insert the casters fully into the bottom ends of the vertical scaffolds, then secure them with locking pins. Ensure that the retaining clip for all locking pins is in place.
3. Place the platform (wood side on top) on to the top of the horizontal support beams, then secure it with the spring-loaded clamps.

Usage Guide

To adjust platform height, pull and hold the spring-loaded pins for the horizontal support beams in the unlocked position, then move the beams to the required height. Release the pins and ensure that they are fully engaged with the vertical scaffolds and are at the same height.

Place the scaffold as close to the work area as possible, then lock all castors (step on the locking lever at each castor). To unlock the castors, step on the smaller unlocking lever.

Use caution when mounting and dismounting the scaffold to prevent movement, tilting etc.

If any items or load is placed on the platform, attempt to spread it as evenly as possible to help prevent tilting or unbalancing the scaffold.

Some experts believe that the incorrect or prolonged use of almost any product may cause serious injury or death. To help reduce your risk of serious injury or death, refer to the information below. For more information, see www.datastreamserver.com/safety

- Consult all documentation, packaging and product labelling before use. Note that some products feature documentation available online. It is recommended to print and retain the documentation.
- Before each use, check the product for loose/broken/damaged/missing parts, wear or leaks (if applicable). Never use a product with loose/broken/damaged/missing parts, wear or leaks.
- Products must be inspected and serviced (if applicable) by a qualified technician every 6 months. This is based on average residential use by persons of average size and strength, and on a property of average metropolitan size. Use beyond these recommendations may require more frequent inspections/servicing.
- Ensure that all users of the product have completed a suitable industry recognised training course before being allowed access to the product.
- The product has been supplied by a general merchandise retailer that may not be familiar with your specific application or description of application. Be sure to attain third-party approval from a qualified specialist for your application before use, regardless of any assurances from the retailer or its representatives.
- This product is not intended for use where fail-safe operation is required. As with any product (for example, automobile, computer, toaster), there is the possibility of technical issues that may require the repair or replacement of parts, or the product itself. If the possibility of such failure and the associated time it may take to rectify could in any way inconvenience the user, business or employee, or financially affect the user, business or employee, then the product is not suitable for your requirements. This product is not intended for use where incorrect operation or a failure of any kind, including but not limited to, a condition requiring product return, replacement, parts replacement or service by a technician may cause financial loss, loss of employee time or an inconvenience requiring compensation.
- If this product has been purchased in error when considering the information presented here, contact the retailer directly for details of their returns policy, if required.
