LED Light Panel Installation Guide

Safety

- This product is not waterproof, and is designed for indoor use only. Do not install outdoors or in damp areas.
- This product must be installed by a licensed electrician. Installation must comply with applicable regulations.
- Electrical supply wiring must be minimum 0.75mm² and must provide an earth connection.
- Disconnect the mains power supply before installation. The connected power supply must comply with the power requirements as stated on the product specification label.
- Mounting surfaces must be capable of supporting product weight.
- Incorrect installation may render the product an electrical hazard or may affect operation of the product. Incorrect installation or product misuse will void any product warranty.
- If the product malfunctions, do not attempt to repair or modify it - contact the retailer or authorized service centre for assistance.
- Handle the product with care as it contains components that can be easily damaged.

Installation

1. Disconnect the mains electrical supply to the circuit that the light will connect to.
2. Remove the ceiling panel where the light is to be installed. Check that the panel size is compatible with the LED light panel before proceeding.
3. Place the driver/transformer on the back of the LED light panel (non-luminous side) and secure it using double-sided tape.
4. Connect the DC output connector from the driver/transformer to the light DC input connector lead.
5. Connect the driver/transformer power supply lead to the mains electrical circuit. The light may feature a standard three-pin plug that allows it to be connected directly to a standard mains output socket.
6. Carefully insert the LED light panel into the ceiling. The ceiling may feature spring clips, rails or other devices to help hold ceiling panels in position - ensure that the LED light panel is properly secured to the ceiling, as required.
7. Connect the mains electrical supply to the circuit that the LED panel light is connected to.

Care and Maintenance

- Clean the light with a dry cloth - do NOT use water, solvents, abrasive or flammable materials for cleaning the light or immerse any part of the light in water or other liquid.
- Allow the light to cool before cleaning.

Some experts believe that the incorrect or prolonged use of almost any product may cause serious injury or death. To help reduce your risk of serious injury or death, refer to the information below. For more information, see www.datastreamserver.com/safety

- Consult all documentation, packaging and product labelling before use. Note that some products feature documentation available online. It is recommended to print and retain the documentation.
- Before each use, check the product for loose/broken/damaged/missing parts, wear or leaks (if applicable). Never use a product with loose/broken/damaged/missing parts, wear or leaks.
- Products must be inspected and serviced (if applicable) by a qualified technician every 6 months. This is based on average residential use by persons of average size and strength, and on a property of average metropolitan size. Use beyond these recommendations may require more frequent inspections/servicing.
- Ensure that all users of the product have completed a suitable industry recognised training course before being allowed access to the product.
- If this product has been purchased in error when considering the information presented here, contact the retailer directly for details of their returns policy, if required.
- The product has been supplied by a general merchandise retailer that may not be familiar with your specific application or description of application. Be sure to attain third-party approval from a qualified specialist for your application before use, regardless of any assurances from the retailer or its representatives.
- This product is not intended for use where fail-safe operation is required. As with any product (for example, automobile, computer, toaster), there is the possibility of technical issues that may require the repair or replacement of parts, or the product itself. If the possibility of such failure and the associated time it may take to rectify could in any way inconvenience the user, business or employee, or financially affect the user, business or employee, then the product is not suitable for your requirements. This product is not intended for use where incorrect operation or a failure of any kind, including but not limited to, a condition requiring product return, replacement, parts replacement or service by a technician may cause financial loss, loss of employee time or an inconvenience requiring compensation.
