

INSTRUCTION FOR CLEANING AND WASTE DISPOSAL

For environmental protection, please dispose of the batteries properly when it is no more functional.

BATTERY REPLACEMENT

Please take away the cover from the back side with your hand. Then take out the battery and replace it, ensuring that the corrected position for the polarity is observed.

CAUTION

- 1) A laser pointer is not a toy and should not come into hands of children. Misuse of this appliance can lead to irreparable eye injuries.
  - 2) Any adjustment to increase the laser power is forbidden. Any liability for damages as a result of not following these safety instructions will be rejected.
  - 3) When using the laser pointer do not point the laser beam towards people and/or reflecting surfaces. Even a laser beam of lower intensity may cause eye damage.
  - 4) The laser pointer includes no servicing components. Do not open the housing otherwise the guarantee is void.
  - 5) Never look directly into the laser beam. The enclosed glasses serve only for reinforcing contrasts in order to improve invisibility of the laser beam. The laser beam can do permanent damage to your eyes. Do not point the laser beam at persons or at Reflecting faces.
  - Do not stare at the laser beam directly, which harms your eyes.
- Keep it out of the reach of children.

Self leveling laser Cross level  
Two-cross lines & four vertical lines  
& dot laser 4V-1H-1D

-1-

**Technical data:**  
Laser wavelength: 635nm for the lines, 650nm for the dot.  
Laser class: II  
Working distance: 10m indoor  
Self leveling range: +/-3°  
Accuracy: +/-1mm/5m  
Power: 3\*LR6 batteries.  
Working temperature: -5°C to +45°C

**Accessories:**  
1\*protective goggles, 3\*LR6 batteries, 1\*aluminium box,  
1\*carry strap

The switch has automatic protective device, the pendulum system is protected at the same time the device is turned off. Able to be connected with tripod by 5/8" thread.

The instrument is 360° rotatable and also fine adjustable in angle.  
The instrument has automatic protective device, the pendulum system is protected at the same time the device is turned off.

The instrument is 360° rotatable and also fine adjustable in angle.  
The instrument has automatic protective device, the pendulum system is protected at the same time the device is turned off.

The instrument apply 635nm laser module for vertical and horizontal laser level, 650nm laser module for the dot laser.

Introduction of the instrument

Part I

-3-

- 1. Put the instrument on a firm plane, or on a tripod, make it in level position approximately. The instrument can not work if the angle range is more than 3°.
- 2. Turn the switch knob in clockwise to turn on the instrument, the green indication light will be turned on and project the laser line.
- 3. Rotate the instrument to put the laser line onto the target.
- 4. Fine-adjust knob for accurate work.
- 5. Use this button to turn on or off the horizontal laser line.
- 6. Press this button 1 time, 2 vertical laser line is visible. Press this button 2 times, all vertical laser line is visible. Anti-clockwise the switch knob to turn off the instrument when the work is done.

Using the instrument:

- 1. Operation panel, with bubble and power indication
- 2. Project window of vertical laser line.
- 3. Project window of horizontal laser line.
- 4. Fine-adjust knob
- 5. Switch and locking knob
- 6. Base

**Some experts believe the incorrect or prolonged use of almost any product could cause serious injury or death. For information that may reduce your risk of serious injury or death consult the points below and additionally, the information available at [www.datastreamserver.com/safety](http://www.datastreamserver.com/safety)**

- Consult all documentation, packaging and product labelling before use. Note that some products feature online documentation which should be printed and kept with the product.
- Check product for loose / broken / damaged / missing parts, wear or leaks (if applicable) before each use. Never use a product with loose / broken / damaged / missing parts, wear or leaks (if applicable).
- Products must be inspected and serviced (if applicable) by a qualified specialist every 6 months assuming average residential use by a person of average weight and strength, above average technical aptitude, on a property matching average metropolitan specification. Intended use outside these guidelines could indicate the product is not suitable for intended use or may require more regular inspection or servicing.
- Ensure all possible users of the product have completed an industry recognised training course before being given access to the product.

- The product has been supplied by a general merchandise retailer that may not be familiar with your specific application or your description of the application. Be sure to attain third party approval for your application from a qualified specialist before use regardless of prior assurances by the retailer or its representatives.
- This product is not intended for use where fail-safe operation is required. As with any product (take an automobile, aircraft, computer or ball point pen for example) there is always a small chance of a technical issue that needs to be repaired or may require replacement of the product or a part. If the possibility of such failure and the associated time it takes to rectify could in any situation inconvenience the user, business or employee or could financially affect the user, business or employee then the product is not suitable for your requirements. This product is not for use where incorrect operation or a failure of any kind, including but not limited to a condition requiring product return, replacement, service by a technician or replacement of parts could cause a financial loss, loss of employee time or an inconvenience requiring compensation.
- If this item has been purchased in error considering the points above simply contact the retailer directly for details of their returns policies if required.
