

Locker Assembly Guide [Rev. 2 Jul 2019]

It is recommended to attach the rear panels to a suitable wall or other immovable object to prevent possible toppling of the unit. Drill holes in the rear panels **A** and **J** and use suitable fasteners or brackets (not supplied) to attach the panels securely to the wall. If you are unsure how to do this, consult a qualified technician or tradesman.

AVANTE

1. Attach side panels **B** and **C** to rear panel **A** using 6 screws **O**. Note that the top of the rear panel has holes along the rail.

2. Bring door panel **D** from the inside of the assembled side panels and pull it forward so the left/right side rails enter the front channels in the side panels. The basic cabinet is now formed.

3. Lower bottom panel **G** into the cabinet and push down so the left / right edges "clip" to the side panels and front/rear edges are supported by the rear / door panels. Perform the same process for middle panel **F**.

4. Insert the lower separator panels **I** into the cabinet between the bottom and middle panels and push sideways so the top / bottom edges "clip" to the bottom / middle panels.

5. Remove the 3 upper doors from the door panel (pull down the upper door hinge to remove). Hook the front edge of the top panel **E** over the top-front rail of the door panel, then push down so the rear / side edges "clip" to the rear / side panels.

6. Insert the upper separator panels **H** into the cabinet, "T" side up, between the middle and top panels and push sideways so the top / bottom edges "clip" to the middle / top panels. Once installed, re-install the upper doors.

7. Insert the 4 pads **P** into the holes on the upper panel.

8. Repeat steps 1 to 6 for parts **J, K, L, M, N** and the remaining parts **F, G, H, I** and **O** to assemble the upper cabinet.

Place the upper cabinet on top of the lower cabinet (if required), so the pads prevent it from being pushed off, then secure both cabinets to the wall or other suitable structure (fasteners and / or brackets not supplied).

Some experts believe that the incorrect or prolonged use of almost any product may cause serious injury or death. To help reduce your risk of serious injury or death, refer to the information below. For more information, see www.datastreamserver.com/safety

- Consult all documentation, packaging and product labelling before use. Note that some products feature documentation available online. It is recommended to print and retain the documentation.
- Before each use, check the product for loose/broken/damaged/missing parts, wear or leaks (if applicable). Never use a product with loose/broken/damaged/missing parts, wear or leaks.
- Products must be inspected and serviced (if applicable) by a qualified technician every 6 months. This is based on average residential use by persons of average size and strength, and on a property of average metropolitan size. Use beyond these recommendations may require more frequent inspections/servicing.
- Ensure that all users of the product have completed a suitable industry recognised training course before being allowed access to the product.
- If this product has been purchased in error when considering the information presented here, contact the retailer directly for details of their returns policy, if required.
- The product has been supplied by a general merchandise retailer that may not be familiar with your specific application or description of application. Be sure to attain third-party approval from a qualified specialist for your application before use, regardless of any assurances from the retailer or its representatives.
- This product is not intended for use where fail-safe operation is required. As with any product (for example, automobile, computer, toaster), there is the possibility of technical issues that may require the repair or replacement of parts, or the product itself. If the possibility of such failure and the associated time it may take to rectify could in any way inconvenience the user, business or employee, or financially affect the user, business or employee, then the product is not suitable for your requirements. This product is not intended for use where incorrect operation or a failure of any kind, including but not limited to, a condition requiring product return, replacement, parts replacement or service by a technician may cause financial loss, loss of employee time or an inconvenience requiring compensation.
