

TREX[®]

ELECTRIC WINCH

T-RX EXTREME SERIES
12,000LBS 4WD WINCH

SAFETY PRECAUTIONS

Warning! Observe safety precautions for personal safety and the safety of others. Improper equipment operation may cause personal injury and equipment damage.

Read the following carefully before attempting to operate your winch and keep the instructions for future reference.

1. Dress properly:

- Don't wear loose clothing or jewellery. They can be caught in moving parts.
- Wear leather gloves when handling winch cable. Do not handle cable with bare hands as broken wires can cause injuries.
- Non-skid footwear is recommended

2. Keep a safe distance:

- Ensure that all persons stand well clear of winch cable and load during winch operation, 1.5 times the cable length recommended. If a cable pulls loose or breaks under load, it can lash back and cause serious personal injury or death.
- Don't step over the cable.
- All visitors and onlookers should be kept away from the work area.
- Keep proper footing and balance at all times.

3. Don't abuse the cord:

- Never carry your winch by the cord or yank it to disconnect it from the receptacle.
- Keep cord from heat, oil and sharp edges.

4. Don't overwork the winch:

- If the motor becomes uncomfortably hot to touch, stop and let it cool for a few minutes.
- Don't maintain power to the winch if the motor stalls.
- Don't exceed maximum line pull ratings shown in tables. Shock loads must not exceed these ratings.

5. Avoid unintentional starting:

- Winch clutch should be disengaged when not in use and fully engaged when in use.

6. Check damaged parts:

- Before using, you should check your winch carefully. Any part that is damaged should be properly repaired or replaced by an authorized service centre.

7. Repair your winch:

-When repairing, use only identical replacement parts or it may cause considerable danger for the user.

8. Re-spool the cable:

-Leather gloves must be worn while re-spooling. To re-spool correctly, it is necessary to keep a slight load on the cable. Hold the cable with one hand and the remote control switch with the other. Start as far back and in the centre as you can. Walk up keeping load on the cable as the winch is powered in.

-Do not allow the cable to slip through your hand and do not approach the winch too closely.

-Turn off the winch and repeat the procedure until all the cable except 1m is in.

-Disconnect the remote control switch and finish spooling in cable by rotating the drum by hand with clutch disengaged.

-On hidden winches, spool in cable under power but keep hands clear.

WINCH OPERATION WARNINGS

Read the following carefully before attempting to operate your winch and keep the instructions for future reference.

1. The uneven spooling of cable, while pulling a load, is not a problem, unless there is a cable pile up on one end of the drum. If this happens reverse the winch to relieve the load and move your anchor point further to the centre of the vehicle. After the job is done, you can unspool and rewind for a neat lay of the cable.

2. Store the remote control switch inside your vehicle where it will not become damaged, inspect it before you plug it in.

3. When ready to begin spooling in, plug in remote control switch with clutch disengaged, do not engage clutch with motor running.

4. Never connect the hook back to the cable, this causes cable damage. Always use a sling or chain of suitable strength.

5. Observe your winch while winching, if possible while standing at a safe distance. Stop the winching process every meter or so to assure the cable is not pulling up in one corner. Jamming the cable can break your winch.

6. Do not attach tow hook to winch mounting plate, they must be attached to vehicle frame.

Vehicle recovery electric winch

7. The use of a snatch block will aid recovery operations by providing a doubling of the winch capacity and a halving of the winching speed, and the means to maintain a direct line pull to the centre of the rollers. When double loading during stationary winching, the winch hook should be attached to the chassis of the vehicle.

8. Ensure rated "D" or bow shackles are used in conjunction with an approved tree trunk protector to provide a safe anchor point.

9. When extending winch cable, ensure that at least five wraps of cable remain on drum at all times. Failure to do this could result in the cable parting from the drum under load. Serious personal injury or property damage may result.

10. All winches are provided with a red cable marking to identify that 5 cable wraps remain on the winch drum when this mark appears at the rollers. No recovery should be attempted beyond this marking.

11. Since the greatest pulling power is achieved on the innermost layer of your winch, it is desirable to pull off as much line as you can for heavy pulls (you must leave at least 5 wraps minimum on the drum---red cable). If this is not practical use a snatch block and double line arrangement.

12. Draping a heavy blanket or similar object over the extended winch cable is recommended as it will dampen any back lash should a failure occur.

13. Neat, tight spooling avoids cable binding, which is caused when a load is applied and the cable is pinched between the others. If this happens, alternatively power the winch in and out. Do not attempt to work a bound cable underload, free by hand.

14. Apply blocks to wheels when vehicles are on an incline.

15. Battery:

- Be sure that the battery is in good condition. Avoid contact with battery acid or other contaminants.
- Always wear eye protection when working around a battery.
- Have the engine running when using the winch, to avoid flattening the battery.

16. Winch cable:

- Be sure that the cable is in good condition and is attached properly.
- Do not use the winch if cable is frayed.
- Do not move the vehicle to pull a load.

Vehicle recovery electric winch

-Do not replace the cable with a cable of lesser strength.

-The life of the cable is directly related to the use and care it receives. Following its first and subsequent uses, a cable must be wound on to the drum under a load of at least 500lbs (230kgs) or the outer wraps will draw into the inner wraps and severely damage the cable during winching. The first winch use should be a familiarization run while in a relaxed, non-recovery situation. Spool out the cable until the red cable mark appears (about 5 wraps on the drum), then rewind the cable on to the drum under a load of 500lbs (230kgs) or more. This will slightly tension and stretch the new cable and create a tight cable wrap around the drum. Failure to do so may result in cable damage and reduced cable life.

-When the cable is replaced, be sure to apply loctite, or an equal compound, to the cable clamp thread. Tighten the clamp screw properly but do not over tighten. The loctite will prevent loosening of the screw in arduous conditions. Loctite 7471 primer and 222 threadlocker are recommended.

17. Do not attempt to exceed the pulling limits of this winch.

18. Do not drive your vehicle to assist the winch in any way. Vehicle movement in combination with winch operation may overload the cable, the winch itself or cause damaging shock loads.

19. Shock loads when winching are dangerous! A shock load occurs when an increase force is suddenly applied to the cable. A vehicle rolling back on a slack cable may induce a damaging shock load.

20. The winches shown in this manual are solely for vehicle and boat mounted, non-industrial applications.

21. Do not use winch in hoisting applications due to required hoist safety factors and features.

22. Do not use the winch to lift, support or otherwise transport personnel.

INSTALLATION

Mounting your winch

1. -The winch is to be mounted into a suitable steel mounting frame using the 4 point foot mounting system in either a horizontal or vertical plane.

--It's very important that the winch be mounted on a flat surface so that the three sections

Vehicle recovery electric winch

(motor, cable drum and gear housing) are properly aligned.

--The fitment of winches and / or a frontal protection system may affect the triggering of SRS air bags. Check that the mounting system has been tested and approved for winch fitment in the airbag equipped vehicle.

2. Winch mounting frames and / or frontal protection systems are suggested to suit most popular vehicles. Winch frames are packaged with detailed fitting instructions.

3. Should you wish to manufacture your own mounting plate the dimensions below will assist. A steel mount plate 6mm thick is recommended. Fasteners should be steel high tensile grade 5 or better. A poorly designed mount may void warranty.

4. The winch should be secured to the mounting with 3/8" UNC x 1-1/4" stainless steel bolts and spring washers provided.

5. The roller fairlead is to be mounted so as to guide the rope onto the drum evenly.

8000lbs, 8500lbs winch

9000lbs, 9500lbs, 10000lbs, 12000lbs, 12500lbs, 13000lbs

Vehicle recovery electric winch

15000lbs, 16000lbs, 16500lbs, 17000lbs, 20000lbs winch

Lubrication installation

All moving parts in the winch are permanently lubricated with high temperature lithium grease at the time of assembly. Lubricate cable periodically using light penetrating oil. Inspect for broken strands and replace if necessary. If the cable becomes worn or damaged it must be replaced.

Cable instillation

Unwind the new cable by rolling it along the ground, to prevent kinking. Remove old cable and observe the manner in which it is attached to the cable drum flange.

Electrical connection (8000,8500,9000,10000,12000,12500,13000lbs)

For normal self-recovery work, your existing electrical system is adequate. A fully charged battery and proper connections are essential. Run the vehicle engine during winching operations to keep battery charged.

Pay close attention to proper electrical cable connection as follows(refer to diagram 1)

1. Short red cable(B'') connecting to the red terminal (B) of the motor.
2. Short black cable with yellow jacket (C'') connecting to the yellow terminal(C) of the motor.
3. Short black cable with black jacket (D'') connecting to the black terminal (D) of the motor.
4. Thin black cable (a'') connecting to bottom terminal (A) of the motor.
5. Long black cable (1.8m), one terminal (A'') connecting to the bottom terminal (A) of the motor, and the other terminal negative (-) connecting to negative (-) terminal of battery.

Vehicle recovery electric winch

6. Long red cable positive (+) connecting to positive (+) terminal of battery.

Electrical connection(15000,16000,16500,17000lbs,20000lbs)

Wireless remote switch installation (if your winch has such accessories)

WIRELESS CONTROL

Vehicle recovery electric winch

Place wireless control inside power unit housing after wiring is complete.

Over load protection installation (if your winch has such accessories)

Note

1. Your battery must be kept in good condition.
2. Be sure battery cables are not drawn taught across any surfaces, which could possibly damage them.
3. Corrosion on electrical connections will reduce performance or may cause a short.
4. Clean all connections especially in remote control switch and receptacle.
5. In salty environments use a silicone sealer to protect from corrosion.
6. Index the heads of the plate studs into the keyhole slots on the back of the winch.
7. Attach the winch/Adaptor plate assembly to your trailer hitch, by inserting the trailer

hitch ball through the shaped hole in the adaptor plate.

Winch operation

Suggestion

The best way to get acquainted with how your winch operates is to make a few test runs before you actually need to use it. Plan your test in advance. Remember you can hear your winch as well as you can see it operate. Get to recognize the sound of a light steady pull, a heavy pull, and sounds caused by load jerking or shifting. Soon you will gain confidence in operating your winch and its use will become second nature to you.

Operating

1. Ensure the vehicle is secure by applying the parking brake or chocking the wheels.
2. Pull out the winch cable the desired length and connect to an anchor point.

The winch clutch allows rapid uncoiling of the cable for hooking onto the load or anchor point. The shifter tab located on the gear housing of the winch operates the clutch as follows:

- a) To disengage the clutch, move the clutch shifter tab into the "OUT" position. Cable may not be free spooled off the drum.
 - b) To engage the clutch, move the clutch shifter tab into the "IN" position. The winch is now ready for pulling.
3. Recheck all cable rigging before proceeding.
 4. Plug in the winch hand control. It is recommended that the winching operation takes place from the driver's position to ensure safe operation.
 5. To commence winching operation, start vehicle engine, select neutral in transmission, maintain engine speed at idle.
 6. Operated the remote control switch to IN or OUT until the vehicle has been retrieved. Regularly check the winch to ensure cable is winding onto the drum evenly.

Note:

1. Never winch with your vehicle in gear or in part, which would damage your vehicle's transmission.
2. Never wrap the cable around the object and hook onto the cable itself. This can cause

Vehicle recovery electric winch

damage to the object being pulled, and kink or fray the cable

3. Keep hands, clothing, hair and jewellery clear of the drum area and cable when winching.
4. Never use the winch if the cable is frayed, kinked or damaged.
5. Never allow anyone to stand near the cable, or in line with the cable behind the winch while it is under power. If the cable should slip or brake, it can suddenly whip back towards the winch, causing a hazard for anyone in the area. Always stand well to the side while winding.
6. Don't leave the switch plugged in when is not in use.

CHECK THE WINCH CAREFULLY AND THOROUGHLY BEFORE OPERATING!

MAINTENANCE

It is highly recommended that the winch be used regularly(once a month). Simply power the cable out 15m, free spool 5m and then power back in. this will keep all components in good working condition so that the winch can be relied on when needed. Contact your authorized outlet for technical assistance and repairs.

TROUBLE SHOOTING		
symptom	Possible cause	Suggested remedy
Motor does not turn on	Safety switch is off	Turn safety switch to ON position
	Switch Assy not connected properly	Insert switch Assy firmly to the connector
	Loose battery cable	Tighten nuts on cable connectors
	Solenoid malfunctioning	Tap solenoid to free contact, applying 12/24 volts to coil terminal directly. Make an audible clicking when activating.
	Defective switch Assy	Replace switch Assy
	Defective motor	Check for voltage at armature port with switch pressed. If voltage is present, replace motor.
	Water has entered motor	Drain and dry. Run in short bursts without load until completely dry.
Motor runs too hot	Long period of operation	Let winch cool down periodically.
Motor runs slowly or without normal power	Battery runs down	Recharge battery by running vehicle
	Insufficient current or voltage	Clean, tighten or replace the connector.
Motor runs but cable drum does not turn	Clutch not engaged	Turn clutch into IN position, if that does not work, as a qualified technician to check and repair.
Motor runs in one direction only	Defective or stuck solenoid	Tap solenoid to free contacts. Repair or replace solenoid.
	Defective switch Assy	Replace switch Assy

Vehicle recovery electric winch

8000lbs features and specification

Single line rated pull	8000lbs (3636kgs)
Motor	5.2hp/3.8kw, series wound
Control	Remote switch
Gear train	3 stage planetary
Gear reduction ratio	235:1
Braking	Automatic load-holding brake
Drum size	Diameter 2.5"(63.5mm) x length 9.6"(244mm)
Cable	5/16"(8.1mm) x 79'(24m)
Remote control switch	Included
Extra wireless remote switch	Optional
Battery	Recommended: 650 CCA
Net weight	36.5kgs
Overall dimension (length x width x height)	21" x 6.3" x 8.6" (532 x 160 x 218mm)
Mounting bolt pattern	10" x 4.5" (254 x 114.3mm)

Pull, speed, amps

Line pull lbs(kgs)	Line speed ft./min (m/min)	Current A
0	22 (6.8)	80
4000 (1818)	12 (3.6)	200
6000 (2727)	9 (2.8)	270
8000 (3636)	6.5 (2)	330

Line pull and rope capacity in layer

Layer	Rated line pull lbs(kgs)	Total rope on drum ft (M)
1	8000 (3636)	19.6 (6.0)
2	6540 (2972)	42.6 (13.0)
3	5500 (2500)	72 (22.0)
4	4750 (2159)	79 (24.0)

8500lbs features and specification

Single line rated pull	8500lbs (3863kgs)
Motor	5.2hp/3.8kw, series wound
Control	Remote switch
Gear train	3 stage planetary
Gear reduction ratio	235:1
Braking	Automatic load-holding brake
Drum size	Diameter 2.5"(63.5mm) x length 9.6"(244mm)
Cable	5/16"(8.1mm) x 79'(24m)
Remote control switch	Included
Extra wireless remote switch	Optional
Battery	Recommended: 650 CCA
Net weight	37kgs
Overall dimension (length x width x height)	21" x 6.3" x 8.6" (532 x 160 x 218mm)
Mounting bolt pattern	10" x 4.5" (254 x 114.3mm)

Pull, speed, amps

Line pull lbs(kgs)	Line speed ft./min (m/min)	Current A
0	22 (6.8)	80

Vehicle recovery electric winch

15000lbs features and specification

Single line rated pull	15000lbs (6818kgs)
Motor	6.0hp/4.5kw,series wound
Control	Remote switch
Extra wireless remote switch	Optional
Gear train	3 stage planetary
Gear reduction ratio	358.4 :1
Braking	Automatic load-holding brake
Drum size	3.5"(88mm)diameterX8.7"(221.6 mm)length
Cable	Φ11mm,26m
Remote control switch	Included
Battery	Recommended: 650 CCA
Net weight	52kgs
Overall dimension (length x width x height)	555×196×249mm
Mounting bolt pattern	10" x 4.5" (254 x 114.3mm)

Pull, speed, amps

Line pull lbs(kgs)	Line speed ft/min (m/min)	Current A
0	23.9/7.28	68
2000 (909)	12.2/3.7	100
4000 (1818)	9.3/2.8	155
6000 (2727)	7.4/2.25	185
8000 (3636)	6.0/1.83	235
10000 (4545)	5.1/1.55	275
12000 (5454)	4.4/1.34	330
15000(6818)	3.3/1.0	435

Line pull and rope capacity in layer

Layer	Rated line pull lbs(kgs)	Total rope on drum ft (M)
1	15000 (6818)	20.4 (6.22)
2	13780(6263)	42.44(12.94)
3	11200(5091)	66.74 (20.35)
4	9390(4268)	85.28 (26.0)

16000lbs features and specification

Single line rated pull	16000lbs (7272kgs)
Motor	6.0hp/4.5kw,series wound
Control	Remote switch
Extra wireless remote switch	Optional
Gear train	3 stage planetary
Gear reduction ratio	358.4 :1
Braking	Automatic load-holding brake
Drum size	3.5"(88mm)diameterX8.7"(221.6 mm)length
Cable	Φ12mm,26m
Remote control switch	Included
Battery	Recommended: 650 CCA
Net weight	52.5kgs
Overall dimension (length x width x height)	555×196×249mm
Mounting bolt pattern	10" x 4.5" (254 x 114.3mm)

Pull, speed, amps

Line pull lbs(kgs)	Line speed ft/min (m/min)	Current A
0	23.9/7.28	68
2000 (909)	12.2/3.7	100
4000 (1818)	9.3/2.8	155
6000 (2727)	7.4/2.25	185
8000 (3636)	6.0/1.83	235
10000 (4545)	5.1/1.55	275
12000 (5454)	4.4/1.34	330
15000(6818)	3.3/1.0	435
16000(7272)	3.12/0.95	490

Line pull and rope capacity in layer

Layer	Rated line pull lbs(kgs)	Total rope on drum ft (M)
1	16000 (7272)	20.4 (6.22)
2	14606(6639)	42.44(12.94)
3	11872(5396)	66.74 (20.35)
4	9933(4524)	85.28 (26.0)

Vehicle recovery electric winch

16500lbs features and specification

Single line rated pull	16500lbs (7500kgs)
Motor	6.0hp/4.5kw, series wound
Control	Remote switch
Extra wireless remote switch	Optional
Gear train	3 stage planetary
Gear reduction ratio	358.4 :1
Braking	Automatic load-holding brake
Drum size	3.5"(88mm) diameter X 8.7" (21.6 mm) length
Cable	Φ12mm, 26m
Remote control switch	Included
Battery	Recommended: 650 CCA
Net weight	53kgs
Overall dimension (length x width x height)	555x196x249mm
Mounting bolt pattern	10" x 4.5" (254 x 114.3mm)

Pull, speed, amps

Line pull lbs(kgs)	Line speed ft./min (m/min)	Current A
0	23.9/7.28	68
2000 (909)	12.2/3.7	100

12000 (5454)	4.4/1.34	330
15000(6818)	3.3/1.0	435
16500(7500)	3.02/0.92	510

Line pull and rope capacity in layer

Layer	Rated line pull lbs(kgs)	Total rope on drum ft (M)
1	16500 (7500)	20.4 (6.22)
2	14606(6639)	42.44(12.94)
3	11872(5396)	66.74 (20.35)
4	9953(4524)	85.28 (26.0)

17000lbs features and specification

Single line rated pull	17000lbs (7727kgs)
Motor	6.0hp/4.5kw, series wound
Control	Remote switch
Extra wireless remote switch	Optional
Gear train	3 stage planetary
Gear reduction ratio	358.4 :1
Braking	Automatic load-holding brake
Drum size	3.5"(88mm) diameter X 8.7" (21.6 mm) length
Cable	Φ12mm, 26m
Remote control switch	Included
Battery	Recommended: 650 CCA
Net weight	53.5kgs
Overall dimension (length x width x height)	555x196x249mm
Mounting bolt pattern	10" x 4.5" (254 x 114.3mm)

Pull, speed, amps

15000(6818)	3.3/1.0	435
16000(7272)	3.12/0.95	455
17000(7727)	2.95/0.9	520

Line pull and rope capacity in layer

Layer	Rated line pull lbs(kgs)	Total rope on drum ft (M)
1	17000 (7727)	20.4 (6.22)
2	15482(7037)	42.44(12.94)
3	12584(5720)	66.74 (20.35)
4	10550(4795)	85.28 (26.0)

Vehicle recovery electric winch

20000lbs features and specification

Single line rated pull	20000lbs (9090kgs)
Motor	6.5hp/4.8kw, series wound
Control	Remote switch
Extra wireless remote switch	Optional
Gear train	3 stage planetary
Gear reduction ratio	358.4 :1
Braking	Automatic load-holding brake
Drum size	3.5"(88mm) diameter X 8.7" (221.6 mm) length
Cable	Φ13mm, 22m
Remote control switch	Included
Battery	Recommended: 650 CCA
Net weight	54kgs
Overall dimension (length x width x height)	555x196x249mm
Mounting bolt pattern	10" x 4.5" (254 x 114.3mm)

Pull, speed, amps

Line pull lbs(kgs)	Line speed ft./min (m/min)	Current A
0	23.9/7.28	68
2000 (909)	12.2/3.7	100

Some experts believe the incorrect or prolonged use of almost any product could cause serious injury or death. For information that may reduce your risk of serious injury or death consult the points below and additionally, the information available at www.datastreamserver.com/safety

- Consult all documentation, packaging and product labelling before use. Note that some products feature online documentation which should be printed and kept with the product.
- Check product for loose / broken / damaged / missing parts, wear or leaks (if applicable) before each use. Never use a product with loose / broken / damaged / missing parts, wear or leaks (if applicable).
- Products must be inspected and serviced (if applicable) by a qualified specialist every 6 months assuming average residential use by a person of average weight and strength, above average technical aptitude, on a property matching average metropolitan specification. Intended use outside these guidelines could indicate the product is not suitable for intended use or may require more regular inspection or servicing.
- Ensure all possible users of the product have completed an industry recognised training course before being given access to the product.

- The product has been supplied by a general merchandise retailer that may not be familiar with your specific application or your description of the application. Be sure to attain third party approval for your application from a qualified specialist before use regardless of prior assurances by the retailer or its representatives.
- This product is not intended for use where fail-safe operation is required. As with any product (take an automobile, aircraft, computer or ball point pen for example) there is always a small chance of a technical issue that needs to be repaired or may require replacement of the product or a part. If the possibility of such failure and the associated time it takes to rectify could in any situation inconvenience the user, business or employee or could financially affect the user, business or employee then the product is not suitable for your requirements. This product is not for use where incorrect operation or a failure of any kind, including but not limited to a condition requiring product return, replacement, service by a technician or replacement of parts could cause a financial loss, loss of employee time or an inconvenience requiring compensation.
- If this item has been purchased in error considering the points above simply contact the retailer directly for details of their returns policies if required.
